## Lines of Code

- Total LoC: 7,952

# Requirements

- View and submit edit requests for existing wikis
- New wiki requests
- Verification request management for wiki creators to maintain accuracy.
- Intuitive user interface for easy navigation

## Requirements

- Comprehensive wiki database covering various series
- Customizable settings to manage spoilers based on user progress
- Secure authentication features for personalized interactions

# Video Demo

# What We Learned

- How to work and communicate with separate teams (members) for frontend and backend
- How to implement quality communication between database and app
- Proper routing and caching
- Knowing when to make database calls and when not to

# What Could Be Improved

- Search feature for wikis
- Inside a wiki, search feature for characters and parts
- Better and more in depth testing
